

Deploy ESET Protect Agent - ESET Protect v.9+ EPX9+ (IP adresa servera)

Tema

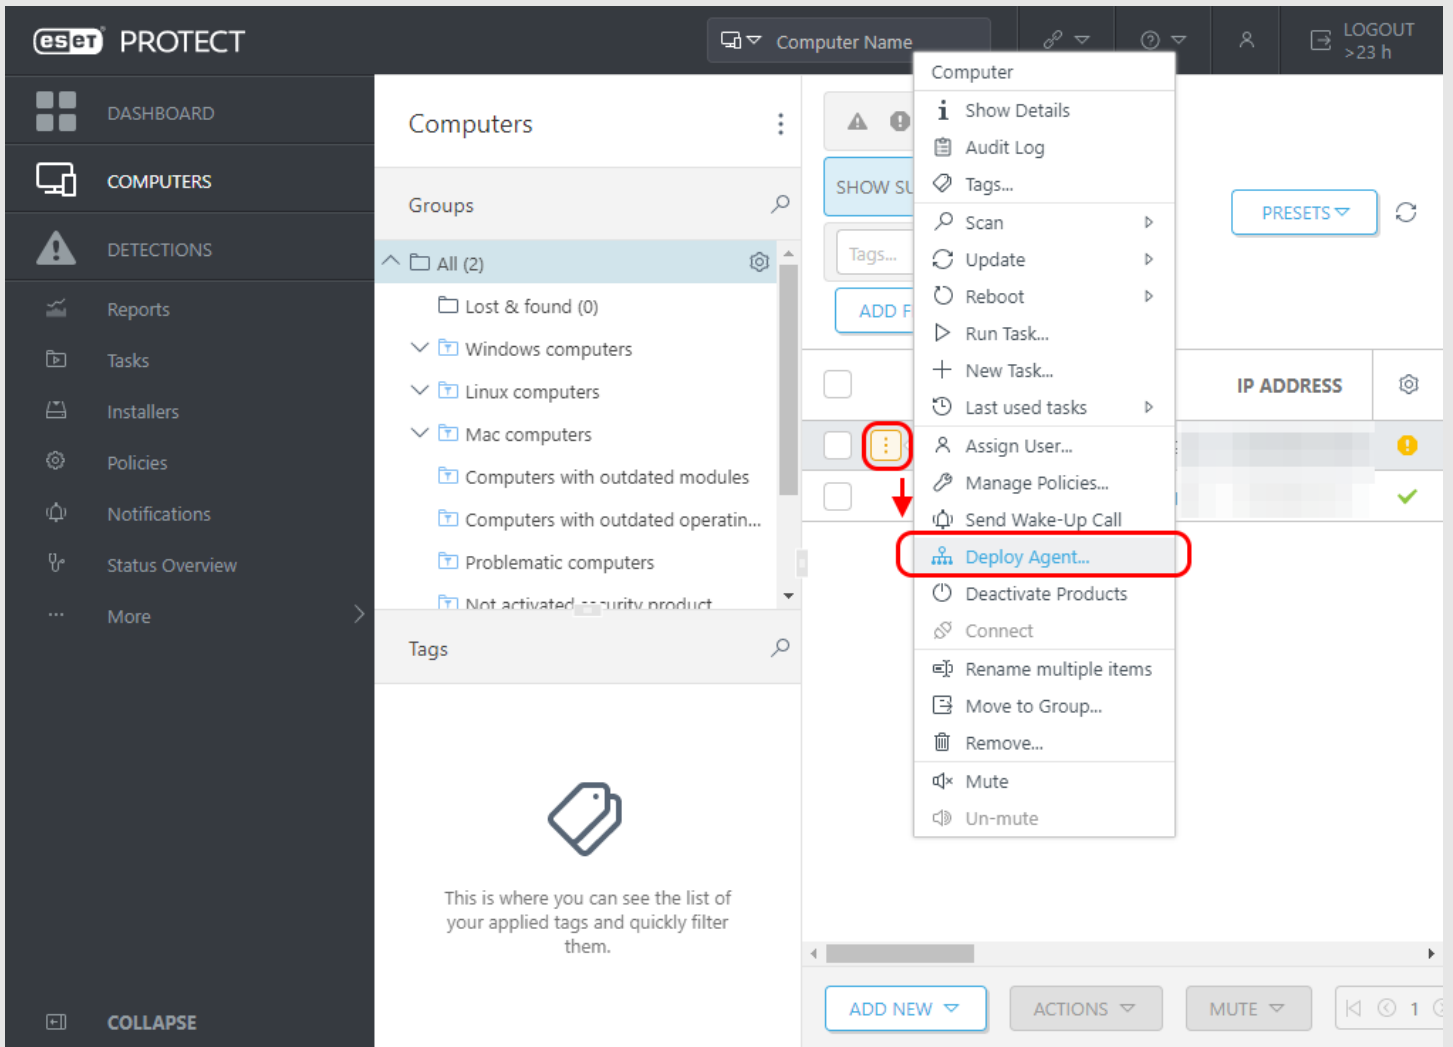

Kreiranje Agent Live Installera za spajanje na ESET Protect (EPX) server putem IP adrese umjesto NetBIOS ili FQDN.

ESET Protect server v.9 (EPX9) i noviji

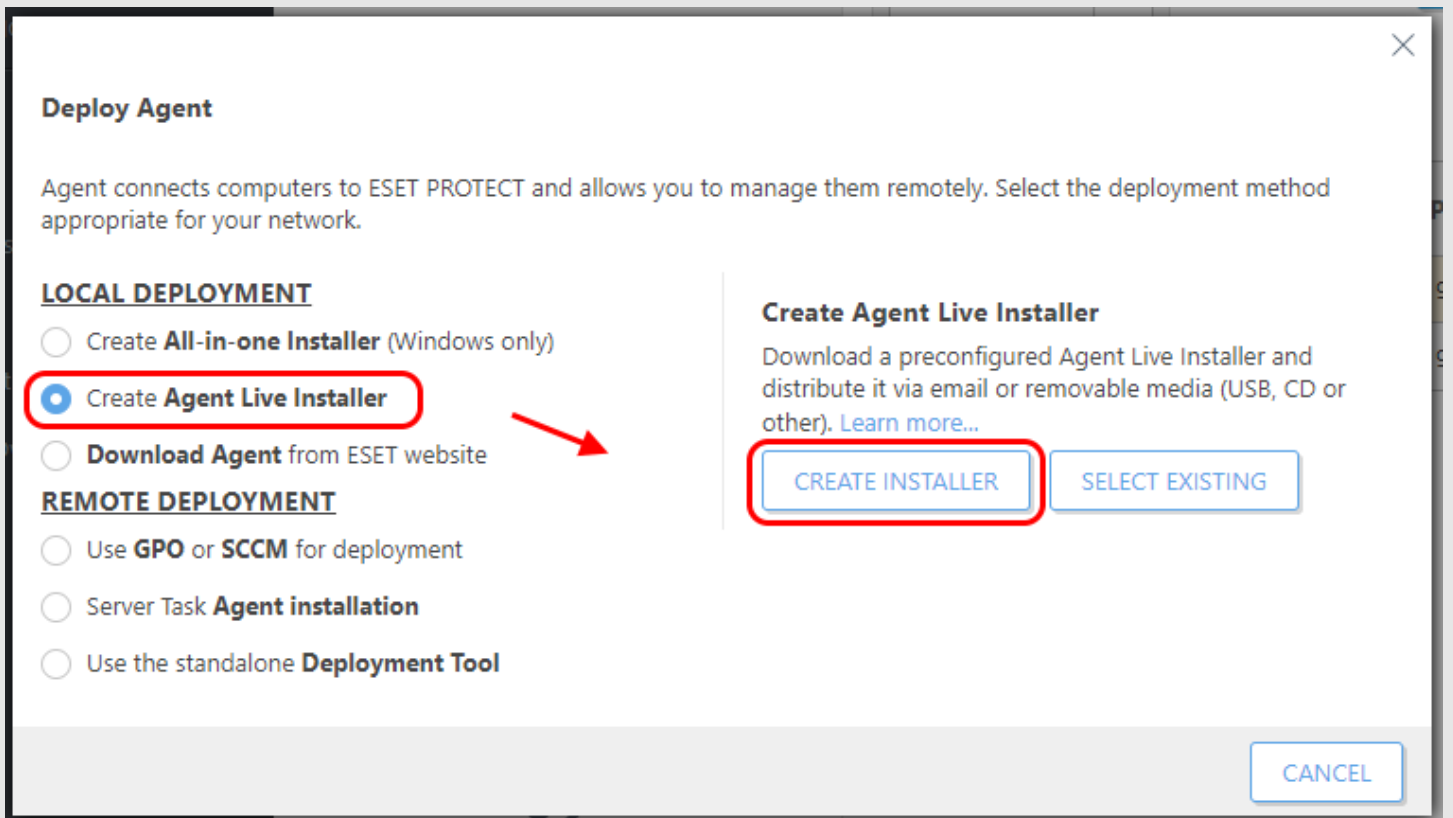

Postupak - Detaljno

- Otvorite ESET konzolu
- Otvorite karticu "Computers"
- Kliknite na bilo koje računalo
- Iz izbornika odaberite "Deploy Agent..." (Sl. "Deploy Agent")
- Označite "Create Agent Live Installer"
- Kliknite na [Create installer] (Sl. "Create installer")
- Na kartici "Agent Live Installers - Certificate" u pravilu samo kliknite [Continue] ako niste ništa mijenjali sa standardnim certifikatima (Sl. "Certificate")
- Na kartici "Agent Live Installers - Configuration" u polje "Server hostname (optional)" upišite IP adresu servera
 - Ako je server dostupan samo računalima na lokalnoj mreži - ovdje upišite njegovu LAN IP adresu (10.*, 172.*, 192.*)
 - Ako je server dostupan i računalima s interneta - ovdje upišite njegovu WAN IP adresu
- Upišite port za komunikaciju Agenata ako nije standardni 2222
- Po potrebi odaberite "Agent configuration" (=policy) i "Parent group (optional)"
- Kliknite na [Finish] (Sl. "Configuration")
- Na kartici "Agent Live Installers - Download" preuzmite odgovarajući paket (Sl. "Download")
- Pokrenite instalacijsku datoteku lokalno na klijentu iz Command Prompta (CMD; Windows) ili Shella (Linux, macOS)
- Pričekajte da se Agent instalira
- Nakon 20-tak minuta provjerite na konzoli je li se računalo pojavilo
- Pošaljite mu poruku sa konzole (<https://www.nod32.com.hr/podrska/kb12534>)
