

# Pregled Koja računala imaju ESET-ov program aktiviran mojom licencom Home licence

## Programi

Upute se odnose na licence kojima možete aktivirati sljedeće programe:

- ESET NOD32 Antivirus (Windows)
- ESET Internet Security (Windows)
- ESET Smart Security Premium (Windows)
- ESET Cyber Security (macOS)
- ESET Cyber Security Pro (macOS)
- ESET Mobile Security for Android / Smart TV

(tzv. "Home licence" za kućne i male korisnike)

## Postupak

- Ako već niste, prvo kreirajte račun na portalu ESET Home (myESET):  
[https://help.eset.com/home\\_eset/hr-HR/?new\\_account.html](https://help.eset.com/home_eset/hr-HR/?new_account.html).  
Račun mora glasiti na e-mail vlasnika licence.
- U drugom koraku možete na portalu pogledati koja su sve računala aktivirana tom licencom:  
[https://help.eset.com/home\\_eset/hr-HR/?devices.html](https://help.eset.com/home_eset/hr-HR/?devices.html)
- Ako uočite da u popisu ima računala na kojima želite deaktivirati ESET-ov program, uklonite ih (deaktivirajte):
